## Ovation **NEW**

**Description:**

The main chassis consists of a complex sandwich of materials. Within the precision-machined bullet-proof-wood layer, it was introduced an elaborate resonance damping measure: an internal 'mat' comprising approximately 100,00 tiny stainless steel balls. The powerful and smooth running DC motor is integrated within and is effectively decoupled by the main chassis. The motor is hidden beneath the platter and drives the precision machined aluminium sub-platter via a precision machined POM main platter are supported by the patented CMB. Almost any commercially available 9 inch tonearm can be fitted by virtue of the easily interchangeable armboards.

### Goldfinger Statement MC **NEW**

**Description:**

Solid 14 kt. gold body features no less than twelve magnets arranged in a clearaudio 12 Magnet ring configuration. The use of twelve magnets has allowed clearaudio to use pure 24 karat gold for the coils, wound with wire 30% thinner than that used previously. This further reduces the moving mass and provides a generator assembly of incredible efficiency.  
Total mass: 17gr / Output: 0,9mV @ 5cm/s
